

FORENSIC NURSES WEEK

November 4 - 10, 2024

What happens when patients who are victims of violence do not receive trauma-informed care to put them on the road to healing and empowerment?

STIs, depression, suicidal ideation, substance abuse and more in the short-term. Reproductive complications, cancer, cardiovascular and other chronic diseases in the long run.

Violence is a public health crisis that impacts individuals, drives up healthcare costs and burdens our healthcare system.

**FORENSIC NURSING
IS THE SOLUTION.**
